The other two are still at large.

—Our schools opened on Monday last, and there was waiting and gnashing of teeth by the boys and girls who would rather play than study. Various dire threats have been made against the members of the school board by the young anarchists, who can not see why the hardship of an education is visited upon them. Monday was a red letter day for many of our worried mothers, who hailed with delight the welcome sound of the school bell, and the many fathers who whiled and complained hard times when the list of new school books required will be handed them. We bespeak an active, earnest, profitable school year. The corps of teachers, back in their original positions, callent one, and we hope both parents and school board will lead them every day and encouragement.

—Jake S. Meyer, formerly of this county, and a son of George Meyer, Esq., of Forbes township, in a letter of recent date, says: "See in the last Sentinel that Wyoming had frost, which no doubt is true. I wish to say that while I have lived in Wyoming since 1880, I do not believe there was ever a day, no matter how hot it was, but what I could look out on the main range of the Rocky mountains and see snow. Now, at this altitude, it does not only frost, but freeze every month in the year. While we have had a very cold season, as a rule, our tomatoes, melons, etc., are ripening up nicely, and up to date we have had nothing hurt by frost in the valleys where we grew our crops. Highest temperature, August 28, 89 degrees; lowest, 45 degrees.
